Collections of plants in the area of Rio Negro, Amazonas, Brazil, 1947.

Richard Evans Schultes

September 5, 1947

Lower Rio Negro — Tauapessassú

8713 Hevea Spruceana. Small tree on sandy shore. Leaflets leathery, glossy dark green above, reclinate. Latex thin, white. Trunk cylindrical. Fl. basally purple, calyx tips yellow.

8714 Hevea brasiliensis. Small tree. Quet. Fl. odorous, yellow. Infl. very short. Latex white, thick. Leaflets membranaceous, reclinate, discolorous. On sandy bank.

8715 Hevea brasiliensis. Same characteristics but leaflets smaller & infl. longer. Quet. Latex thick, white. Leaflets extremely dark green, glossy above.

September 4

Lower Rio Negro — Manáos
Road off Estrada do Aleixo km. 8

8716 Micrandra heterophylla Ima. major. Enormous tree 110 ft. Buttressed to 10 ft. diameter above buttresses 2½ ft.

Bark very thick, bright reddish inside, dark brown red, smooth outside. Latex thick, white. Fl. yellow, very pungently aromatic. Leaves ~~fete~~ of varying size. On sandy soil near brooke in light forest. Serrajaana

8717 ~~Neabohonia fagifrons~~ Anomalocalyx Uleanus. Rel. small tree, 50 ft. tall or less. Trunk cylindrical, not buttressed. Bark spotted grey + black, smooth. No latex in trunk but tips branches have a red latex. Growing with Micrandra, Cunuria, + Hevea guianensis in loc. of 8716. Leaves rather thick, fleshy.

8718 ✓ Small bush. Acalypha? In forest, high sandy soil.

5 8719 ✓ Stifftia unflora. Fl. red pink. Vine. Cult. in Manáos garden. Cutting from the type plant from near Sta. Isabel on Rio Negro.

2 8720 ✓ Paepalanthus fastigiatus. On sandy caatingas around Manáos.

1 8721 ✓ Gentianacese. Fl. white. Hb. on sandy caatingas near Manáos.

NB No. 8952 was collected in Rio [illegible] north. It is exceedingly common in the [illegible] Not seen on Rio Negro. Both Mozambique [illegible]

tall, with [illegible] yellow [illegible] Flowers [illegible] Not [illegible] white [illegible] (# 8958)

✓ 8945 [illegible]

✓ 8946 [illegible]

✓ 8947 [illegible]

✓ 8948 [illegible]

✓ September 11, 1947. Santa Isabel (Tapirapecuara) Rio Negro.

✓ 8948 Chorisandra. Stachydrina

✓ 8949 Small Tree. Annonaceae

✓ 8950 Vine?

✓ 8951 Small tree.

✓ 8952 Vine. Sapindaceae.

✓ 8953 Small tree.

✓ 8954 Vismia. Guttifera.

✓ 8955 Small tree. Fruit small. Near Sonneratia. Lecythidaceae.

✓ 8956 Herbaceous, Stem 3½. Corolla 2.5 cm.

✓ 8957 Herb. 7 ft. white.

✓ October 30, 1947. São Felix on the Rio Negro

← 8958 Small tree. Tree 15 to 20 - 40 ft. tall, sparingly [illegible] - [illegible] Fl. grn. white. Fruit orange

✓ 8959 [illegible]

✓ [illegible]

✓ Oct. 2nd, '47. Manaos Rio Negro.

✓ 8960 Mimosa. Tree, about 30 ft. [illegible]

✓ 8965A Phyllanthus sp. Euph. Fruit [illegible]

✓ 8965B [illegible], Fl. white. Fruit [illegible]

[illegible]

8970A Cunoniaceae. Small tree. Fl. white.

✓ 8961 [illegible]

✓ 8962 Sedum [illegible] Small bush. Fruited.

✓ 8963 Thymelaeaceae. Bush. Fruits white.

October 18, 1947 Ilha de Flores, Faz. da Varanda

✓ 8964 Cunonia capensis. Tree 65-70 ft. tall, columns above 3-4 ft. dark brittle bark, inner about 1/4 inch. Bark rough and cracked, dirty brown externally, pink internally, [illegible], thick, brittle. Leaves opposite, white, leaves light beneath, thick above. Cunoniaceae. Extremely abundant in native vegetation on very light forest soil and in thinned forest!

✓ 8965 Cunonia capensis. Same characters as on 8964. Flowers creamy white.

October 4, 1947 Terceira

✓ 8966 Pomaceae. [illegible] All Hts.

✓ 8967 [illegible]

✓ 8968 [illegible] Calceolaria [illegible] Cerro.

✓ 8969 [illegible] Cerro.

[illegible] 1947 São Gabriel, alongside at [illegible] São Gabriel.

✓ 8970 Hex [illegible] Tree [illegible] Latex, white [illegible]

S. Kochii
Kiss.

S. cedrifolia (Bunge)
Sprenj.

Cuscuta tuberosa n. sp. Schultz et Mauricia spec. nov.

- Tubercula cerea, usque ad 65 mm alta (cl. minimum 2), usque ad 10-12 mm lata (cl. minima prope basin 1 mm), cylindrica, [illegible] sursum [illegible] tenuia; [illegible] cinereo-albida, 2-3 mm crassa; copiosa fragilia, succo lacteo albo. Folia nulla. Flores in racemos, fasciculos ovata vel ellipticos = rotundata*, omnino glabra, sessilia, in specimine typico [illegible] 10—25 cm longos, 10—15 cm lata (cl. minima prope basin 1 mm), apice valde saturata, basi sordida, margine [illegible], supra atrovirescentia, infra pallidiora; rami secundarii 12-15*, subtus non [illegible], superficie inferiore pallide albescentia, aromatica, dentibus, bracteis [illegible] tenuissimis, dentiformibus, deltoideis, acutis, ad 1 mm altis. Petala cracca, ovato-oblonga, 3-7 mm longa, 2-3 mm in diametro; glabra, [illegible] [illegible] [illegible]. Flores albi ignoti. Fructus [illegible] globosa, rotunda, vix 3½ mm x 2,8 mm, vix 2,8 mm x 2 mm, apice [illegible] glabra, 2-3 mm crassa, fibrosa*, in loculis lignosa, tenuissima, 1 mm crassa; [illegible] [illegible]; [illegible]. Semina adhuc ignota [illegible].

BRAZIL: [illegible] - Rio [illegible], [illegible], Base d. Serra Tucano. [illegible] in caatinga [illegible] Alt. [illegible], [illegible] with H. [illegible] and H. [illegible]. Tuberous [illegible], not [illegible], 50 ft. tall, [illegible].

... to be checked, gray or reddish brown ... [illegible] ... [illegible] ... relatively ... [illegible] ... [illegible] ... [illegible]

to [illegible] (33 × 28 mm.) than that of C. glaber (55–60 mm. × 30), and the cranial portion is to be rounded at the apex whereas that of the latter tends to be somewhat tapering. Whether such figures of the cranium are to be considered absolutely valid remains to be found.

[illegible] rather [illegible] to [illegible] Japan, refers to [illegible] Japanese [illegible] [illegible] [illegible]

Euphorbiaceae (Franz Eilsperger):

I. Árvores ou arbustos; folhas sem vasos laticíferos e com tecido fibrilar medullar; flores dioicas ou monoicas, em inflorescências

✓ Phyllanthoideae

II. Ervas ou subarbustos; vasos laticíferos frequentes; folhas com vasos laticíferos; flores dioicas

A. Inflorescências parciais cymiformes

1. Estames livres ou connados na base, com a antera posta por baixo; calículo ausente; flores masculinas em glomérulos axillares, com 1 estame; flores femininas em racemos terminais; ovário 3-locular, com 3 óvulos, 3 estiletes bifidos, pendentes por baixo da antera.

✓ Euphorbioideae

2. Estames connados na base; flores nuas

a) calículo ausente; raro presente

+ Flores masculinas em glomérulos; flores femininas em racemos, espigas ou glomérulos

✓ Acalypheae

++ Flores masculinas e femininas em glomérulos, em dichasios, raro, em racemos

✓ Jatropheae

+++ Flores masculinas em glomérulos, em racemos ou em dichasios simples, terminais

✓ Manihoteae

b) Calículo presente, imbricado

+ Flores masculinas com petalas, em

inflorescencias parciais afilares ou
folíferas, subpl. ou paniculadas
✓ Cistíneas

++ Flores masculinas dialistemones; inflores-
cencias parciais aglomeradas em
cabeças ou espigas ou afilares; raro
isoladas ou solitárias
✓ Salicíneas

+++ Flores masculinas apétalas; inflores-
cencias parciais terminais, espigadas, raro isoladas; raro simples
✓ Euforbiáceas

B Estames numerosos, parcialmente soldados
✓ Cupuliferas

Tribu Phyllanthoideae

Flores monóicas ou dióicas, raro com cálice e
corola, em regra apétalas; estames livres ou diversamente soldados; ♀ ovário 2-6-locular; óvulos
2 em cada lóculo; fruto em regra cápsula, raro
drupa ou baga; sementes com albúmen carnoso
ou farináceo; muitas vezes com cistólitos
tamníferos, mais raro vasos laticíferos
I. Folhas alternas, inteiras
A. Flores masculinas em inflorescencias
agl. ou fas., afilares.
1. Endosperma pouco; estames livres; flores
monóicas.
✓ Savia

2. Sem endosperma
a) Flores masculinas em regra com pe-

Tubo, ou funil raro, solitário ou
+ Pistilo descontínuo, bífido ou bí-
fidos; estames ± uma saliência
curta; cápsula dorsal dorsal
✓ Euphorbia
++ Estames sociais, discóides; cápsula
carnosa
✓ Jatropha
b) Flores apétalas
+ Estiletes ± ramos finos, às vezes
dilatados no ápice; flores subcen-
trais ou laterais, ♂ ou ♀ ou
solitárias
α) Flores masculinas com rudimento
de ovário; estiletes 2 - 8 ramo-
sos
✓ Securinega
αα) Flores masculinas sem rudimento
de ovário; disco desenvolvido
✓ Phyllanthus
++ Estiletes muito dilatados, foliá-
ceos; em regra com rudimento de
ovário nas flores masculinas; ovário
1 ÷ 2 locular
✓ Euphorbia
B Flores [illegible] e simultaneamente
1) [illegible]
2) [illegible]
✓ Hieronyma

ovario 3-locular; stylus 2-4; stigmata 3-4

✓ Division

II. Foliola alterna, 5-lobata, glabra, margine [illegible] apice [illegible]; stipulae 4-5; calyx 8-10, fructu deposito

✓ Nervation
